

**Will your  
NEW RESAW  
have all these  
time and labour  
saving features?**

- Three rates of feed—49', 73' and 108' per minute
- Anti-friction roller fitted at front and rear of table for easy handling of heavy timber
- Anti-friction rollers fitted to near-side table edge to facilitate returning of the timber to the sawyer
- Handwheel and screw for easy canting of fence
- Fence adjusts across table by large handwheel and screw
- Feed roller adjustable vertically for varying depths of cut
- Feed roller cants up to 30°; and both roller and shaft are detachable, leaving table clear for hand feeding

- Foot lever releases pressure on roller to stop feeding
- Motor is mounted on main frame at the out-feed end
- Improved saw guard giving complete protection to the sawyer

**Wadkin 24" Roller Feed  
Circular Resaw, Type P.S.**

**T**HIS modern, power-fed circular resaw is designed for deeping up to 7", also for flattening and bevel sawing. It is particularly adaptable for general purpose sawing and ideal for working in conjunction with a modern high speed moulder. It is compact, self-contained and unusually economical in floor space, due to its principle of operation and unique drive arrangement. Powerful, convenient and easy to operate it has many technical features that guarantee fast, accurate, low-cost production. A 36" Resaw, type OA, for cutting up to 14" deep is also available.
